

### Student at General Assembly

Jun `21 - Sep `21

Web development fundamentals. Studied JavaScript, React, Vue, Firebase and a little of Rails and Node.

### UX Designer at Nurture Cloud

Jul `20 - Jun `21

Designed UI for existing iOS, Android and Web within design systems. Ran user interviews and concept tests.

### UX Designer at Frasil

May `20 - Jul `20

### UX Designer at The Big Crunch

Mar `19 - Mar `20

Designed productivity tools at a 4 person startup. We ran over 30 user tests and interviews for less than \$200. I swapped hats to various roles as we pivoted.

### Design / Marketing / Product at Ailo / LPMA

Mar `15 - Nov `19

Wore many hats as the company tripped. Worked closely with stakeholders and developers to design and build websites. Delivered working MVPs within two weeks.

### About me

I'm a front end developer and UX designer with a love for building things from scratch quickly, thinking through experiences end-to-end and all things product.

I have strong skills and five years experience in user interface design and in website development (HTML and CSS), with a broad supporting skill set including user experience, front-end development (JS, React, Vue), marketing automation and media.
